

## Testimonial – Bergen Group Hanøytangen

**Bergen Group Hanøytangen** is accommodating large offshore projects and successful coordination of simultaneously executed projects, sets a clear requirement for the **Highest Standards of Safety**.

I am very familiar with **BLH Stop Drop™ Barricading**, consequently it was a natural choice for Bergen Group Rigservice to integrate this unique Stop Drop™ Barricading system as **Best Practice**.

BLH Stop Drop Barricading is an established standard Safety Measure specification for all our rig services.

Cost-Benefit analysing concludes;

Benefits of installing BLH Stop Drop Barricading supersedes the cost.

The simplicity and flexibility of this barricading system provides **Major Cost Saving** and **Safety Improvement**. BLH Stop Drop Barricading **effectively reduces the risk** of dropped objects, a major hazard in our industry.

Since implementing BLH Stop Drop Barricading in our Safety Specifications for Rig Services, we have **ZERO dropped objects** in the secured areas.

**I highly recommend BLH Stop Drop™ Barricading to increase personnel's safety by reducing the risk of dropped objects.**

Med vennlig hilsen/ Kind regards

**Bjørghild Skogerbø**
